KILLER INCOME

Perfected for 2021

Welcome to Killer Income

Killer Income is one of the most long standing, updated, and profitable products on the HackForums marketplace. You've made the right decision purchasing this money making course, myself and my team have dedicated months of research and time into creating the Killer Income course, optimized for online monetization in 2021.

To make money with any of the methods in this course, you simply need to follow the instructions exactly as they are given. If you want to maximize your earnings, I recommend you look for personal twists and differences you can find. Of course, I will assist in anything you need via live Discord support.

by **Trappy**

Method #1

This method includes using Amazon Gift Cards at a cheap rate, usually around 70% and cashing them out for much higher profits. In this first method, we will be utilizing a method using the website purse.io to make orders for people using these gift cards. With Purse, your payment depends on your level. To begin making profits, your account must be at least a level 2 or 3. If you have the money to spend initially then I recommend this method for you, although you will not start seeing profits for some time. Method #2 will go into a twist of this method that allows you to earn instantly. If that is of more interest to you, I recommend you check that out.

Step 1:

The first thing you need to do is get Amazon Gift Card (AGC). You can do this in several ways, but the easiest and most profitable way to get it is on HackForums or OGUUsers. You can also acquire AGC on Paxful, but be cautious of scammers. Forum sites like HF, OGUUsers, Nulled, Cracked, and MPGH are also great sites to acquire AGC. Make sure you pay no more than 75% or you won't be making much profit.

On HackForums, you can navigate to the currency exchange section (<https://hackforums.net/forumdisplay.php?fid=182>), and look for anyone selling AGC and buy from them. Usually, you can get \$100 AGC for about \$75.

Step 2:

Once you have the amount in AGC that you desire, navigate to <https://purse.io> and register an account. No extra verifications are needed, only a real email address.

Step 3:

Once you have signed up, navigate to the “Earn BTC” link (<https://purse.io/earn/btc>) and look for an offer matching your country.

	18%	\$16.99	0.00401265	 mirkosechi	New User	>
	19%	¥ 5000	0.01056418	 tada_you1	★★★★☆ 416	>
	23%	¥ 6135	0.0124993	 yoshimune	★★★★☆ 940	>
	23%	¥ 6135	0.0124993	 yoshimune	★★★★☆ 940	>
	23%	\$50	0.01125314	 iPayYou_io	★★★★☆ 9975	 >
	23%	\$50	0.01125314	 iPayYou_io	★★★★☆ 9975	 >

For example, if you live in America, you will want to chose the option I circled.

Step 4:

Once you find an offer you like, click on it, you will be prompted with an image similar to the following.

Offer Details

1 Accept 2 Purchase 3 Complete

\$16.99
USD

⇄

0.00400208
BTC

EFFECTIVE RATE: \$4245.29 / BTC 

 Items ship from US to IT

ITEMS TO PURCHASE
TNP Bluetooth Game Controller Wirel ... \$16.99

ACCEPT OFFER (BTC)

NO THANKS

Click where it says “Accept Offer (BTC)” and then accept the instructions as they will be prompted on the following screens thereafter.

Step 5:

As you complete the order, you will be paid out to your purse account in bitcoin. Let’s do a overview of how much money you just made.

If you bought a \$50 Amazon Gift Card for \$37 bitcoin, and then done the task on Purse, you will end up with \$60 bitcoin. That is a \$23 profit with less than **10 minutes** of your time. Repeat this task three times a day, and you’ve made **\$69!**

Method #2 (Twist)

This is a twist on Method #1. It is the same idea but utilizes a different way of cashing out the gift cards. For all intents and purposes, step one is the same, you still must acquire the Amazon Gift Card at the lowest possible rate.

Step 2: Here you will need to go to Amazon and purchase a Best Buy gift card for the amount of the AGC you purchased. So if you have a \$100 Amazon Gift Card, buy a \$100 Best Buy gift card with the Amazon Gift Card on your account. Once you have the best buy gift card, proceed to step 3.

Step 3: Now you will want to navigate to www.cardcash.com. On this website you will be able to sell your Best Buy gift card to the site for PayPal. They pay about 87% for best buy gift cards, so for your \$100 best buy gift card, you will receive \$87 in PayPal. The process is all very simple and quite fast, you will come out earning almost immediately.

Step 4: Now let’s review profits. Beginning with \$70~ in bitcoin you used to purchase the AGC, you now have \$87 in PayPal. This can be repeated as many times as you want to maximize your profit.

Method #3

This method includes using OneVanilla prepaid cards and using them for profit. The process is very straightforward and is an excellent way to earn.

Step 1: You will want to navigate once again to Paxful.com to buy discount gift cards. Search for OneVanilla on the website and see your offers.

Step 2: Look for an offer where they are selling the card for under 60% rate. Ideally we will want to acquire a \$100 card for \$50 or so. Be cautious of scammers when buying the card.

Step 3: Once you have acquired the card, there are various ways to use it. To send the funds directly to yourself, add the card to a different PayPal account and then send the money from the different PayPal account to your own PayPal account.

Step 4: If you do not have a different PayPal account, you can create an account on Shoppy.gg and make a listing of a product that matches the value of the gift card, and add your PayPal email to the Shoppy.

Step 5: Once your product is up, use a VPN and go to the link of your product and go to checkout, and select checkout as a PayPal guest. Then enter the card details and PayPal will process the payment without another PayPal account. Sometimes this fails so it is more reliable to use a second PayPal account. Your profits will be enormous.

Method #4

Internet forums have interesting items for sale. The best part of the products and services sold on places like HackForums are their profitability when resold on other marketplaces like Ebay.

Step 1:

The first thing you will want to do is look around the HackForums marketplace for *legitimate* items that can be resold. Use the search function on HackForums

(<https://hackforums.net/search.php>).

In this example, I searched “Netflix” and found a perfect thing to resell on Ebay. It is important you don’t attempt to resell hacked accounts or anything of that nature, as your listing on Ebay will be removed.

I suggest you use the search function to look up other websites that may have their services sold at a discounted rate. Some more examples could be Hollister, American Eagle.

Step 2:

After you acquire a product being sold at a discount on HF, you will want to create a listing for the exact same thing you purchased on Ebay.

As you can see in the screenshot, a \$100 card is being sold for \$60. On HackForums, that card was probably acquired for \$20, so that seller is making \$40 every sale.

If you bought a \$100 Netflix gift card for \$20, and then sold it for \$60 on Ebay, you will have made **\$40** on every sale. If you sell 3 gift cards a day, that's an easy **\$120!**

Method #3

The following method requires next to little skill, knowledge, or effort to do. If you have a large amount of capital, this method is absolutely perfect for you. Exchange rates for crypto currencies vary greatly, on one website a coin may sell at \$1 but on another it may sell for \$0.95. Arbitraging is taking advantage of that difference.

Step 1: Navigate to coinmarketcap.com, and look at the list of coins.

For this example, I looked at Lisk. Lisk (at the time of writing this), is priced at \$1.22 on coinmarketcap. Look at this screenshot to see the prices between two different exchanges,

2	 Binance	LSK/BTC	\$615,034	\$1.22	14.12%	Spot	Percentage	Recently
3	 UPbit	LSK/KRW	\$408,733	\$1.19	9.38%	Spot	Percentage	Recently
4	 HitBTC	LSK/BTC	\$369,620	\$1.22	8.48%	Spot	Percentage	Recently
5	 CoinEgg	LSK/BTC	\$328,930	\$1.26	7.55%	Spot	Percentage	Recently

Step 2: Head over to where it is selling for cheaper, in this example, it is \$1.19 on UPbit and \$1.26 on CoinEgg. Deposit BTC into UPbit, and buy as much Lisk as you can, for this example, we are going to pretend we purchased 1000 Lisk.

That 1000 Lisk is worth \$1190 on UPbit. However, once we send it over to CoinEgg, it is now worth \$1260. You just made \$70 for doing absolutely nothing.

Step 3: You can sell that on CoinEgg, and send the money back to UPbi to do all over again, imagine how much you can make per day doing this. By simply doing this process 3 times you would have made **\$210**.

That is the conclusion of the main Killer Income course. Along with the main course that is this file, my training includes several bonus methods which I **HIGHLY** recommend you utilize to maximize your earnings. The higher tier of my course you purchased, the more methods you will receive, the better support you will get, and the more money you will make.

My official contacts are in my thread and HackForums signature. I respond to all inquiries fastest on Skype, so please send any questions you have there. Email support will take considerably longer.

LETS MAKE SOME F**KING MONEY!!
